

Use-Case Flow Specification

UC-03: Book Skill Session

Peer Skill Exchange & Mentorship Network (Problem #56)

Student: Vaibhav Raj Warriar | PES1UG24CS640

Preconditions

- The Learner Member is registered and logged in.
- The Skill Mentor has published availability for the requested skill.
- The calendar service is working.

Main Success Scenario

1. The Learner Member opens the skill marketplace and searches for a skill (e.g., Python tutoring).
2. The system shows the mentors who offer that skill, sorted by rating and availability.
3. The Learner Member picks a mentor and an available time slot.
4. The system checks the learner's time-credit balance (UC-06 Check Time-Credit Balance, «include») to make sure there are enough credits.
5. The system reserves the slot and sends a booking confirmation to the learner and the mentor.
6. The system creates an iCal event and adds it to both synced calendars.
7. The session status is set to Scheduled.

Alternate Flow: A1 Insufficient Time Credits

- A1.1. At step 4, the system finds that the learner's balance is too low.
- A1.2. The system shows the error: 'Insufficient time credits to book this session.'
- A1.3. The system gives two options: (a) browse skills the learner can teach to earn credits, or (b) cancel.
- A1.4. If (a), the system takes the learner to the skill-offering page. If (b), the system goes back to the skill browse screen. No booking is created either way.

Postconditions

- **Success:** A confirmed booking exists, both users got a notification and calendar entry, and the session status is Scheduled. No credits are moved yet; they move after both sides sign off.
- **Alternate (A1):** No booking is created and the learner's credit balance is unchanged.
